

Laurens County Clerk of Superior Court has some exciting news to share with you!

Our Deed Index books spanning years 1966 through 1998, as well as all the corresponding Deed Volumes 228-534, have been digitally imaged and are now searchable online!

Our office has partnered with Kofile and is utilizing QUICKLINK® to support an infinite number of simultaneous searches 24/7, improving public service by providing electronic access to search Index books and corresponding records, and reducing the time associated with courthouse-based research.

The way QUICKLINK® works is easy. Simply select the type of record you're looking for from a dropdown menu, the year or range of years of the record, and the last name of the parties on the record. Within seconds QUICKLINK® will find the associated Index Pages with entries pertaining to that section of the alphabet. Simply use the Search For Document tool to find the specific Deed Volume and Page of the instrument. All documents are available for purchase.

Click or type the address below to enter our site:

Typical queries by title companies, abstractors, or attorneys require data older than 30 years. QUICKLINK® automates searches and provides significant cost savings from full indexing.
